

Process and Document Management for the Supply Chain

ABOUT GLOBAL 360

Global 360 helps organizations to better manage processes today and make improvements for tomorrow. Our process and document management solutions improve business performance by maximizing the productivity of all participants in a process. Building on our strength in financial services, government, insurance, manufacturing, telecommunications and the retail sector, Global 360 has helped more than 2,000 customers in 70 countries reduce paper, automate processes, and empower individuals to truly change how work gets done.

Global 360, Inc. is headquartered in Texas with operations in North America, Europe, and the Pacific Rim. For more information about Global 360's process and document management solutions, please call 1.214.520.1660 or visit the company web site at www.global360.com.

Leverage Global 360 BPM Solutions to increase your operational efficiency

Companies face increasing complexity and risk in the supply chain. With mounting margin pressures and uncertainty in consumer spending patterns, every decision becomes a critical opportunity to improve productivity and better compete for customers.

That means your business requires strategies to increase visibility and performance throughout the supply chain and achieve balance in the cash-to-cash cycle. Because in today's tough markets, you need to have the same control and visibility over the financial supply chain, those processes that drive your company's cash, accounts, net performance and working capital, as you do over the physical movement of goods.

With successful implementations worldwide, Global 360 understands the challenges you face and how Business Process Management (BPM) can provide a sustainable advantage.

Whether your primary business is manufacturing, distribution, or retail, Global 360 solutions help your company focus on improving such key process areas as:

- » Order-to-cash, including customer claims and dispute resolution
- » Procure-to-pay, including accounts payable visibility and exception handling
- » Client services, including customer correspondence management, and
- » Employee lifecycle management, including on-boarding and off-boarding

Global 360: Shifting from the 'way work moves' to 'how work gets done' to capture value for your company.

Whether your goals are to comply with complex business rules for customer disputes or to gain faster access to supplier information for accounts payable, you already know that people are your organization's most important asset to meet those goals. That's why at Global 360, we believe your process needs to work for the people, not the other way around.

Most vendors build their solutions around a model-driven implementation, letting that model dictate how work gets done. This "standard" approach ultimately treats users as an afterthought. Improving process with speed alone can only help you make the same mistakes faster; and forcing an unfamiliar, non-intuitive user interface on staff can hurt productivity more than it helps. This, in a nutshell, is where Global 360 differs from most other BPM providers.

360° Experience: Productivity depends on your point of view.

Our role-based interface, called viewPoint, delivers a unique view of the information that is most valuable to each type of user, and helps them to do their jobs better. So your employees can be more productive in their jobs. Improving accounts payable, for example, when errors cause delays and unnecessary adjustments, such as goods being received for which no invoice has been generated, or vice versa. Thus causing the processor to track down the information, delaying the process and possibly missing time-sensitive vendor discount terms.

Your managers and executives can gain transparency into the business, enabling them to make smarter and more profitable decisions. For example, set your key performance indicators as part of the process. As thresholds are exceeded (e.g., service levels not being met), work can be dynamically re-allocated until service levels are brought back into balance.

And, your designers can automate the process more effectively, resulting in improved process management. User application development accounts for over 40% of deployment costs. We think that there's a smarter way to spend nearly half your deployment dollars. Our solution provides drag-and-drop process building, application design tools, and pre-built activities, so systems can be quickly implemented, and easily maintained and improved.

Global 360: The most complete view of all assets and all participants who are vital to success.

We believe the process should provide the capability for users to work together, aggregating the information that users need, and structuring the flow of work between users and organizations. Some vendors allow you to add documents as attachments, but we go much further by making all documents an integral part of the process. For example, process rules based on specifications around customer claim types could determine automatic workflow prioritization and claims routing: retrieved documents would be placed in an electronic folder and routed to the appropriate processor, with the highest dollar folders filtered to the top of the worklist for fastest processing.

Further, we establish audit trails and can assign tasks associated with a document, for example, verifying that proper signatures are in place for employee on-boarding or offboarding. From receipts and e-mails to voicemail messages, every document is treated as a full participant in your process. And, we give you the ability to digitize, edit, certify, and manage those documents – which makes attachments seem almost archaic.

Bottom-line, every user gets the single view of the specific information they need to get their work done. And, that translates to better business results for your company.

"Global 360 is absolutely strategic in giving adidas the competitive edge." Ultimately, adidas is now better able to meet its corporate goals of "achieving excellence in execution" and providing world-class customer service."
